YOUR WEEKLY NEWSLETTER

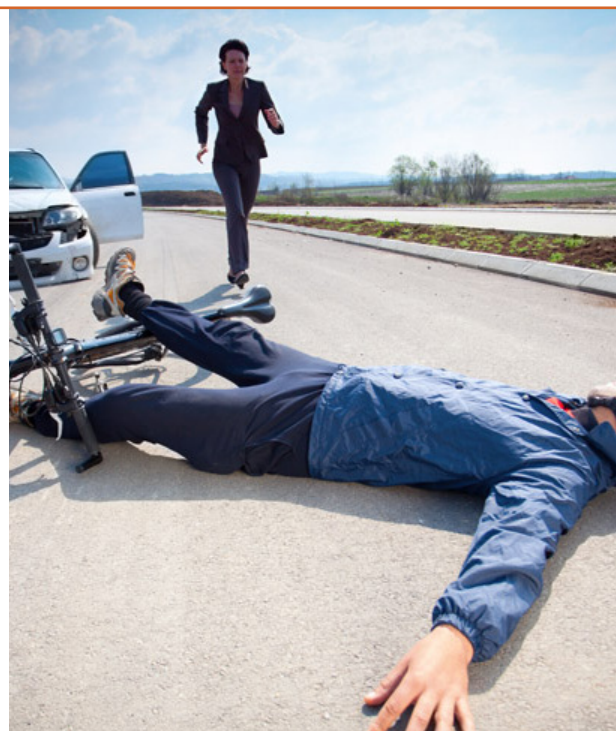

Dear Valued Partners and Colleagues

The Road Accident Fund continues to evolve in policy, practice, and expectations. As your medico-legal partner, MedSol highlights several key developments shaping case preparation and client advocacy in 2025:

Serious Injury Narratives Require Granular Justification:

Recent audit feedback has emphasized the need for explicit causal links between injury, clinical symptoms, functional loss, and long-term employability. RAF 4 submissions must reflect this rigor.

AMA Guides 6th Edition Enforcement Tightens:

WPI calculations are now under higher scrutiny. Ensure your reports reference the appropriate page/table/chart for each impairment — a MedSol standard.

Early Multi-disciplinary Assessment Matters:

Courts and claim reviewers increasingly favor holistic evaluations, including surgical, psychological, vocational, and neurocognitive assessments — especially for minors and polytrauma cases.

Digital Dockets = Faster Settlements:

Our AI-assisted reporting platform ensures accelerated turnaround and clean, court-ready reports for time-sensitive cases.

Trust MedSol for defensible, compliant, and insightful medico-legal reporting. For a bundled medico-legal panel referral package or to schedule regional assessments, reply to this email or contact us.
