5TH EDITION

Dear Valued Partners and Colleagues

Welcome to the expanded Issue 5 of MedSol Insights. This edition introduces our comprehensive Turnkey Vendor Support Model, designed to streamline medico-legal reporting for plaintiff attorneys and service providers involved in RAF Serious Injury claims.

MedSol's Turnkey Vendor Support Model — Simplifying Complex Medico-Legal Reporting

The preparation of high-quality, defensible medico-legal reports demands clinical expertise, administrative precision, and detailed compliance with RAF protocols. Many clinicians and vendors struggle with:

- Limited time for report writing.
- Complex AMA 6th Edition impairment calculations.
- Accurate ICD-10 coding.
- Formatting reports to withstand RAF audit scrutiny.

MedSol's Turnkey Vendor Support Model solves these challenges, allowing service providers to focus on assessments while we manage report generation from start to finish.

What MedSol Offers Vendors:

- **Report Drafting & Structuring:** We transform your clinical notes, assessment forms, and diagnostic findings into fully formatted medico-legal reports.
- **AMA 6th Edition WPI Calculations:** Accurate impairment calculations, with proper table, page and combination referencing.
- **ICD-10 Coding Compliance:** Complete diagnostic coding to ensure audit-aligned submissions.
- **Narrative Integration:** Comprehensive serious injury narratives aligning impairment, functional limitations, and vocational impact.
- **Fast Turnaround (24–48 hours):** Vendors submit their assessments; we deliver completed reports rapidly.

Benefits to Vendor Partners:

- **Time-Saving:** Eliminate hours spent on administrative report writing.
- **Increased Case Volume:** Free clinicians to see more clients.
- **Standardized Report Quality:** Consistent formatting across all cases, meeting RAF submission standards.
- **Reduced Errors:** Professional oversight ensures accurate calculations and coding.
- **Audit-Resistant Submissions:** Reports prepared to pre-empt common RAF audit pitfalls.
- **Scalable Growth:** Vendors can confidently increase service capacity without sacrificing report quality.

Vendor Collaboration Drives Practice Growth

A regional occupational therapy practice partnered with MedSol to manage their medico-legal report writing. Within 3 months, they increased assessment volume by 50%, reduced report turnaround time to under 48 hours, and achieved 100% acceptance on audited RAF files. Attorneys reported high satisfaction with report clarity, accuracy, and claim efficiency.

Knowledge Bite: The Hidden Cost of Report Writing

Studies indicate that clinicians spend up to 50-60% of medico-legal time on non-billable administrative tasks such as report drafting, referencing, and formatting. By outsourcing report generation to MedSol, vendors reclaim this lost time, improve client service delivery, and significantly boost revenue potential.

Upcoming Focus (Next Issue):

- RAF 2025 Audit Trends: Key Areas of Scrutiny
- Pre-Claim File Screening Services: Maximizing Claim Viability
- Case Structuring Consultations for Complex Claims
